ABOUT ME

Motivated and detail-oriented individual with a strong interest in technology, data, and digital innovation. Experienced in working on creative and analytical projects, with the ability to adapt, collaborate, and solve problems effectively.

EDUCATION

Karnavati University | 2023 - 2027

Bachelors of Science (Hons.) in Computer Science

WORK EXPERIENCE

The Digital Drafts | 2025 - Present

Co-Founder

- Co-founded The Digital Drafts, a digital platform for creatives, managing content creation and brand development across social media platforms.
- Designed engaging marketing content including carousels and visual posts to enhance audience engagement and brand visibility. Assisted in designing and implementing websites, digital cards, posts, and reels to improve user experience and platform reach.

Brightpeers Infotech | May - June 2026

AI-ML Intern

- Developed an AI-Powered Business Intelligence Platform using Python, FastAPI, React, and SQL, enabling natural language data exploration, automated analytics, interactive dashboards, and AI-generated business insights.
- Integrated LLMs, NLP, and RAG to transform user queries into accurate database operations, improving analytics efficiency and decision-making.

NewStar Infotech | Jan - March 2026

Data Science Intern

- Collected, cleaned, and analyzed datasets to improve data quality and usability.
- Worked with Python and Microsoft SQL Server (MSSQL) for data management and analysis.
- Maintained project timelines by tracking deliverables and coordinating tasks within the team.

PROJECTS

AI based automated Data Analytics tool

Built an Intelligent Data Analytics Platform to automate data analysis, KPI tracking, visualization, and report generation, allowing users to interact with business data using natural language.

Backend REST API Application

Built a Node.js & Express.js backend with CRUD APIs, MongoDB integration, and error handling.

Data Analysis and Visualization using R Programming

Performed data analysis and visualization using R libraries such as ggplot2, dplyr, and tidyverse. Cleaned and manipulated datasets using dplyr and tidyverse for accurate analysis.

SKILLS

- Programming Languages** - Python, SQL, R
- Frontend Development** - HTML, CSS, Bootstrap
- Backend Development** - Node.js, Express.js
- Database** - Microsoft SQL Server, MongoDB
- Tools** - Git, GitHub, Visual Studio Code, Docker
